Objective

Seeking the realisation of a dream and professional goal that is to enter the labour market as a Front-End Programmer, acting in the development of web applications.

Professional profile
As a Front-end developer with an academic background, I have strong skills in HTML, CSS, and JavaScript, which allow me to create intuitive and responsive user interfaces. I also have some experience with GIT and can work effectively in a team. I am always seeking new opportunities to apply my skills and continue to grow professionally. If you are looking for a technology-driven Front-end developer with a solid foundation in technical skills, please do not hesitate to contact me.
In addition to my technical skills, I am highly motivated and committed to delivering innovative solutions for the projects I work on. Furthermore, I am always interested in learning new technologies and tools to enhance my problem-solving abilities and deliver high-quality results. I have a collaborative and communicative approach, which allows me to work with other development team members and project stakeholders to understand project needs and requirements and create solutions that meet their needs. If you are looking for a motivated, committed, and experienced Front-end developer, please feel free to contact me, and let's discuss how I can add value to your development team.
